INDICES

Volume 36 (1995)

The editorial board
wants to express its warmest
appreciation and thanks to all

referees and authors

who have contributed to the 1995
issues of Acta Radiologica

SUBJECT INDEX TO VOLUME 36 (1995)

Nervous system (incl. skull)

Cerebral thromboembolic complications associated with the use of a nonionic contrast medium in coronary angiography 69
Intracranial iotrolan distribution following cervical myelography. Postmyelographic registration of adverse effects, psychometric assessment and electroencephalographic recording 77
Texture analysis in quantitative MR imaging. Tissue characterisation of normal brain and intracranial tumours at 1.5 T 127
Brain metastases – Comparison of gadodiamide injection-enhanced MR imaging at standard and high dose, contrast-enhanced CT and non-contrast-enhanced MR imaging 300
CNS-effects from subarachnoid injections of iohexol and the non-ionic dimers iodixanol and iotrolan in the rabbit 307
Contrast media leakage to the cerebrospinal fluid after intravenous injection. Comparison of stroke patients and controls 440
Echo-planar MR cerebral blood volume mapping of gliomas. Clinical utility 520
Pituitary microadenoma. MR appearance and correlation with CT 529
Deuterium MR *in vivo* imaging of the rat eye using ^2H_2O 552
Classfication of spontaneous dural arteriovenous fistulas with regard to their pathogenesis 582
CT features of olivopontocerebellar athrophy in children 593
Skull metastases from hepatocellular carcinoma. CT, MR and angiographic findings 597
MR imaging of 495 consecutive cases with sensorineural hearing loss 603
Adrenoleukodystrophy. A case report 610
Neural tolerance of the non-ionic dimers iodixanol and iotrolan and the non-ionic monomer iopamidol during myelography in non-anaesthetised rabbits . . 644

Ear, nose, throat and eye

Vascular mass lesions and hypervascular tumors in the head and neck. Characteristics at CT, MR imaging and angiography 136
Craniopharyngioma identification by CT and MR imaging at 1.5 T 142
Advanced imaging of head and neck tumors. Review article 566

Bones, joints and soft tissue

Discovertebral junction of the spine - A cadaveric study by spin-echo MR imaging 1
MR imaging of multiple myeloma in tumour mass measurement at diagnosis and during treatment . . 9
Low-field MR imaging (0.1 T) in patients with clinically suspected acute spinal block 15
Ultrasonography in arthritis of the knee. A comparison with MR imaging 19
Static, dynamic and first-pass MR imaging of musculoskeletal lesions using gadodiamide injection . . 27
Bipartite atlas and hypertrophy of its anterior arch. A case report 152
Low-field MR imaging for the assessment of therapy response in musculoskeletal infections 220
Muscle edema in MR imaging of neuromuscular diseases 228
Early roentgenological grading of femoral shortening is correlated to the late outcome after femoral neck fractures 233
Automatic biopsy instruments used through a coaxial bone biopsy system with an eccentric drill tip 237
Computed vs. film-screen magnification radiography of fingers in hyperparathyroidism. An ROC analysis 290
Magnetization transfer contrast on gradient echo MR imaging of the temporomandibular joint 295
Clinical results after percutaneous automated lumbar nucleotomy. A follow-up study 418
MR imaging and radiography of patients with cervical hyperextension-flexion injuries after car accidents 425
Computed radiography in scoliosis. Diagnostic information and radiation dose 429
Legg-Calvé-Perthes disease. Comparison of conventional radiography, MR imaging, bone scintigraphy and arthrography 434
Differentiation between contained and noncontained lumbar disk hernias by CT and MR imaging 491
CT-diskography in patients with sciatica. Comparison with plain CT and MR imaging 497
Low-field MR imaging of the spine. A comparative study of a traditional and new, completely balanced gradient-echo sequence 505
CT-diskography, diskomanometry and MR imaging as predictors of the outcome of lumbar percutaneous automated nucleotomy 613
Diagnosis by ultrasound of dislocated ulnar collateral ligament of the thumb 620

Breasts

Contrast-enhanced MR imaging of the breast in patients with breast implants after cancer surgery . . . 111
Nonpalpable breast lesion. Stereotaxic core needle aspiration biopsy with a single pass 117
Mammography and ultrasound in the diagnosis of contralateral breast cancer 358
Ultrasonographic *in vitro* examination of nonpalpable breast masses. A new method 671

Cardiovascular system

Coronary angioplasty using a low osmolar nonionic contrast medium. A retrospective angiographic and clinical evaluation 54
Cerebral thromboembolic complications associated with the use of a nonionic contrast medium in coronary angiography 69
A new technique for nonsurgical repair of peripheral pseudoaneurysm 100
Vascular mass lesions and hypervascular tumors in the head and neck. Characteristics at CT, MR imaging and angiography 136
Contrast medium-induced vasoconstrictions. An investigation of the vasoconstrictive action of iohexol in isolated rabbit coronary arteries 198
In vivo thromogenicity of intravascular ultrasound imaging catheters 280
Vasoconstriction of isolated arteries induced by angiographic contrast media. A comparison of ionic and non-ionic contrast media iso-osmolar with plasma 312
Carbon dioxide in vascular imaging and intervention 330
Dy-DTPA-BMA as an indicator of tissue viability in MR imaging. An experimental study in the pig . . . 338
MR imaging of double-contrast enhanced porcine myocardial infaction. Correlation with microdialysis 346
Intravascular ultrasound of the portal vein – Normal anatomy 388
Flow measurements with digital subtraction densitometry in a steady flow experimental model 402
Classfication of spontaneous dural arteriovenous fistulas with regard to their pathogenesis 582
MR imaging of gadolinium-DTPA-BMA-enhanced reperfused and nonreperfused porcine myocardial infarction 633

Mediastinum and respiratory system

Experiences with a teleradiology system in pulmonary diseases 37
Radiation burden in high-resolution CT of the lungs 106
Pleuro-pulmonary aspergillosis. US and US-guided biopsy as an aid to diagnosis 122
Pulmonary sequestration. Visualization of an enlarged azygos system by CT 265
Endoscopic ultrasonography with guided fine needle aspiration biopsy of a mediastinal mass lesion . . . 326
Radiographical incidence and course of bronchopulmonary dysplasia in 100 consecutive low birth weight neonates 353
Anatomical shape of the airways in two different European populations. A radio-anatomical study of the airways 448
Survival of patients after resection for lung cancer. Predictive value of staging by CT vs thoracotomy 515
CT-assessment of dependent lung densities in man during general anaesthesia 626
AMBER chest radiography and patient dose measurements 641

Digestive tract

Association of rectal diverticula and scleroderma . . . 96
Percutaneous gastrostomy guided by ultrasound and fluoroscopy 159
Ultrasonographic findings after conservative treatment of acute appendicitis and open appendicectomy . . 173
Microradiographic anatomy of the explanted rat colon 210
Simple and safe device for pneumatic reduction of intussusception 215
Pyloric size in normal infants and in infants suspected of having hypertrophic pyloric stenosis 261
Aberrant right gastric vein draining directly into the quadrate lobe of the liver. A case report 270
Midgut carcinoid tumours. CT appearance 367
Defecography 460
Videoradiography of free jejunal grafts for rehabilitation of speech in laryngectomized patients 469
Colo-colonic intussusception caused by lipoma. Case reports 478
MR imaging of adult colo-rectal intussusception. A case report 656

Liver, biliary tract

Correlation between chondroitin sulfate iron colloid-enhanced MR imaging and the histological grade of hepatocellular carcinoma 102
Prediction of the time to peak hepatic enhancement to optimize contrast-enhanced spiral CT 154
MR imaging of hepatocellular carcinoma. Correlation of metal content and signal intensity 163
Fine needle aspiration biopsy of hydatid cysts 168
Aberrant right gastric vein draining directly into the quadrate lobe of the liver. A case report 270
Multiple bile duct hamartomas: US, CT, and MR findings. A case report 273
Detectability of hypervascular hepatocellular carcinoma by arterial phase images of MR and spiral

CT 372
Hepatic portal venous gas. Imaging modalities and clinical significance 377
Budd-Chiari syndrome misinterpreted as an infiltrating liver mass. A case report 393

Spleen, pancreas

Focal fatty masses of the pancreas 178
Dynamic high-field MR imaging in experimental porcine acute pancreatitis 182
Ultrasonographic and endoscopic ultrasonographic angiography in pancreatic mass lesions 381

Abdomen

Digital luminescence radiography and conventional radiography in abdominal contrast examinations . . 284
Oral contrast media in CT of the abdomen. Iohexol of different concentrations as a gastrointestinal contrast medium 396
Ultrasonically guided insertion of a peritoneo-gastric shunt in patients with malignant ascites 481
Yield and complications in ultrasound-guided biopsy of abdominal lesions. Comparison of fine-needle aspiration biopsy and 1.2-mm needle core biopsy using an automated biopsy gun 485
Contrast enhancement of the upper abdomen evaluated by CT. A comparison between iohexol 350 mg I/ml and iopamidol 370 mg I/ml 549

Urogenital system

Effect of iopentol on renal function and its use for calculation of glomerular filtration rate in children 64
Congenital urethral polyp – A rare cause of infravesical obstruction. A case report 196
Noninvasive assessment of renal artery stenosis. A comparison of MR angiography, color Doppler sonography, and intraarterial angiography 243
Cervical invasion of endometrial carcinoma – Evaluation by parasagittal MR imaging 248
Imaging of solid kidney tumours in children 254
Ultrasound-guided renal biopsy with biopsy gun technique – Efficacy and complications 276
Intraobserver and interobserver variations in sonographic measurements of kidney size in adult volunteers. A comparison of linear measurements and volumetric estimates 399
Determination of the relative glomerular filtration rate of each kidney in man. Comparison between iohexol CT and ^{99m}Tc-DTPA scintigraphy 410
MR imaging of tubo-ovarian abscess 510
Comparative study of the dialysability of iobitridol and iohexol in the rat with impaired renal function 545

Endocrine system

Contrast-enhanced dynamic MR imaging of postmolar gestational trophoblastic disease 188
MR imaging in advanced abdominal pregnancy. A case report of fetal death 193
Dynamic Octreotide scintigraphy in neuroendocrine tumours 474
CT and MR imaging of adrenal hemangioma. A case report 659

Pediatric radiology

Effect of iopentol on renal function and its use for calculation of glomerular filtration rate in children 64
Simple and safe device for pneumatic reduction of intussusception 215
Imaging of solid kidney tumours in children 254
Pyloric size in normal infants and in infants suspected of having hypertrophic pyloric stenosis 261
Radiographical incidence and course of bronchopulmonary dysplasia in 100 consecutive low birth weight neonates 353
Legg-Calvé-Perthes disease. Comparison of conventional radiography, MR imaging, bone scintigraphy and arthrography 434
CT features of olivopontocerebellar athrophy in children 593
Adrenoleukodystrophy. A case report 610

Digital radiography

Digital luminescence radiography and conventional radiography in abdominal contrast examinations . . 284
Computed vs. film-screen magnification radiography of fingers in hyperparathyroidism. An ROC analysis 290
Computed radiography in scoliosis. Diagnostic information and radiation dose 429

Ultrasonography

Ultrasonography in arthritis of the knee. A comparison with MR imaging 19
Pleuro-pulmonary aspergillosis. US and US-guided biopsy as an aid to diagnosis 122
Ultrasonographic findings after conservative treatment of acute appendicitis and open appendicectomy . . 173
Focal fatty masses of the pancreas 178
Noninvasive assessment of renal artery stenosis. A comparison of MR angiography, color Doppler sonography, and intraarterial angiography 243
Pyloric size in normal infants and in infants suspected of having hypertrophic pyloric stenosis 261
Multiple bile duct hamartomas: US, CT, and MR findings. A case report 273

Ultrasound-guided renal biopsy with biopsy gun technique – Efficacy and complications 276
In vivo thromogenicity of intravascular ultrasound imaging catheters 280
Endoscopic ultrasonography with guided fine needle aspiration biopsy of a mediastinal mass lesion . . . 326
Mammography and ultrasound in the diagnosis of contralateral breast cancer 358
Hepatic portal venous gas. Imaging modalities and clinical significance 377
Ultrasonographic and endoscopic ultrasonographic angiography in pancreatic mass lesions 381
Intravascular ultrasound of the portal vein – Normal anatomy 388
Budd-Chiari syndrome misinterpreted as an infiltrating liver mass. A case report 393
Intraobserver and interobserver variations in sonographic measurements of kidney size in adult volunteers. A comparison of linear measuremnts and volumetric estimates 399
Yield and complications in ultrasound-guided biopsy of abdominal lesions. Comparison of fine-needle aspiration biopsy and 1.2-mm needle core biopsy using an automated biopsy gun 485

CT

Radiation burden in high-resolution CT of the lungs 106
Vascular mass lesions and hypervascular tumors in the head and neck. Characteristics at CT, MR imaging and angiography 136
Craniopharyngioma identification by CT and MR imaging at 1.5 T 142
Wooden foreign bodies in CT. Case reports and experimental studies 148
Prediction of the time to peak hepatic enhancement to optimize contrast-enhanced spiral CT 154
Percutaneous gastrostomy guided by ultrasound and fluoroscopy 159
Focal fatty masses of the pancreas 178
Imaging of solid kidney tumours in children 254
Pulmonary sequestration. Visualization of an enlarged azygos system by CT 265
Multiple bile duct hamartomas: US, CT, and MR findings. A case report 273
Midgut carcinoid tumours. CT appearance 367
Detectability of hypervascular hepatocellular carcinoma by arterial phase images of MR and spiral CT 372
Hepatic portal venous gas. Imaging modalities and clinical significance 377
Budd-Chiari syndrome misinterpreted as an infiltrating liver mass. A case report 393
Oral contrast media in CT of the abdomen. Iohexol of different concentrations as a gastrointestinal contrast medium 396
Legg-Calvé-Perthes disease. Comparison of conventional radiography, MR imaging, bone scintigraphy and arthrography 434
Ultrasonically guided insertion of a peritoneo-gastric shunt in patients with malignant ascites 481
Differentiation between contained and noncontained lumbar disk hernias by CT and MR imaging 491
CT-diskography in patients with sciatica. Comparison with plain CT and MR imaging 497
Survival of patients after resection for lung cancer. Predictive value of staging by CT vs thoracotomy 515
Pituitary microadenoma. MR appearance and correlation with CT 529
Contrast enhancement of the upper abdomen evaluated by CT. A comparison between iohexol 350 mg I/ml and iopamidol 370 mg I/ml 549
CT features of olivopontocerebellar athropy in children 593
Skull metastases from hepatocellular carcinoma. CT, MR and angiographic findings 597
Adrenoleukodystrophy. A case report 610
CT-diskography, diskomanometry and MR imaging as predictors of the outcome of lumbar percutaneous automated nucleotomy 613
Diagnosis by ultrasound of dislocated ulnar collateral ligament of the thumb 620
CT-assessment of dependent lung densities in man during general anaesthesia 626
CT and MR imaging of adrenal hemangioma. A case report 659
Ultrasonographic *in vitro* examination of nonpalpable breast masses. A new method 671

MR and spectroscopy

Discovertebral junction of the spine – A cadaveric study by spin-echo MR imaging 1
MR imaging of multiple myeloma in tumour mass measurement at diagnosis and during treatment . . 9
Low-field MR imaging (0.1 T) in patients with clinically suspected acute spinal block 15
Static, dynamic and first-pass MR imaging of musculoskeletal lesions using gadodiamide injection . . 27
Deuterium MR spectroscopy at 4.7 T. Quantification of tumour and subcutaneous tissue blood flow in animal models 85
Artifacts in MR imaging caused by small quantities of powdered iron 92
Correlation between chondroitin sulfate iron colloid-enhanced MR imaging and the histological grade of hepatocellular carcinoma 102
Contrast-enhanced MR imaging of the breast in patients with breast implants after cancer surgery . . . 111
Texture analysis in quantitative MR imaging. Tissue characterisation of normal brain and intracranial tumours at 1.5 T 127

Vascular mass lesions and hypervascular tumors in the head and neck. Characteristics at CT, MR imaging and angiography 136
Craniopharyngioma identification by CT and MR imaging at 1.5 T 142
MR imaging of hepatocellular carcinoma. Correlation of metal content and signal intensity 163
Dynamic high-field MR imaging in experimental porcine acute pancreatitis 182
Contrast-enhanced dynamic MR imaging of postmolar gestational trophoblastic disease 188
MR imaging in advanced abdominal pregnancy. A case report of fetal death 193
Low-field MR imaging for the assessment of therapy response in musculoskeletal infections 220
Muscle edema in MR imaging of neuromuscular diseases 228
Noninvasive assessment of renal artery stenosis. A comparison of MR angiography, color Doppler sonography, and intraarterial angiography 243
Cervical invasion of endometrial carcinoma – Evaluation by parasagittal MR imaging 248
Imaging of solid kidney tumours in children 254
Multiple bile duct hamartomas: US, CT, and MR findings. A case report 273
Magnetization transfer contrast on gradient echo MR imaging of the temporomandibular joint 295
Brain metastases – Comparison of gadodiamide injection-enhanced MR imaging at standard and high dose, contrast-enhanced CT and non-contrast-enhanced MR imaging 300
Evaluation of volume selection methods *in vivo* MRS. Design of a new test phantom 317
Artefacts caused by dental filling materials in MR imaging 323
Dy-DTPA-BMA as an indicator of tissue viability in MR imaging. An experimental study in the pig . . . 338
MR imaging of double-contrast enhanced porcine myocardial infaction. Correlation with microdialysis 346
Detectability of hypervascular hepatocellular carcinoma by arterial phase images of MR and spiral CT 372
MR imaging and radiography of patients with cervical hyperextension-flexion injuries after car accidents . 425
Legg-Calvé-Perthes disease. Comparison of conventional radiography, MR imaging, bone scintigraphy and arthrography 434
Differentiation between contained and noncontained lumbar disk hernias by CT and MR imaging 491
CT-diskography in patients with sciatica. Comparison with plain CT and MR imaging 497
Low-field MR imaging of the spine. A comparative study of a traditional and new, completely balanced gradient-echo sequence 505
MR imaging of tubo-ovarian abscess 510
Echo-planar MR cerebral blood volume mapping of gliomas. Clinical utility 520
Pituitary microadenoma. MR appearance and correlation with CT 529
Deuterium MR *in vivo* imaging of the rat eye using ^2H_2O 552
Efficient memory management strategy in hypermedia with interactive MR images 556
Skull metastases from hepatocellular carcinoma. CT, MR and angiographic findings 597
MR imaging of 495 consecutive cases with sensorineural hearing loss 603
Adrenoleukodystrophy. A case report 610
CT-diskography, diskomanometry and MR imaging as predictors of the outcome of lumbar percutaneous automated nucleotomy 613
MR imaging of gadolinium-DTPA-BMA-enhanced reperfused and nonreperfused porcine myocardial infarction 633
Cine phase contrast angiography of normal and diseased peripheral arteries 649
MR imaging of adult colo-rectal intussusception. A case report 656
CT and MR imaging of adrenal hemangioma. A case report 659
Use of an enhanced gradient system for diffusion MR imaging with motion-artifact reduction 662

Nuclear radiology

Dynamic Octreotide scintigraphy in neuroendocrine tumours 474
A 3-D method for delineation of activity distributions and assessment of functional organ volumes and SPECT 536

Interventional radiology

A new technique for nonsurgical repair of peripheral pseudoaneurysm 100
Nonpalpable breast lesion. Stereotaxic core needle aspiration biopsy with a single pass 117
Pleuro-pulmonary aspergillosis. US and US-guided biopsy as an aid to diagnosis 122
Percutaneous gastrostomy guided by ultrasound and fluoroscopy 159
Fine needle aspiration biopsy of hydatid cysts 168
Automatic biopsy instruments used through a coaxial bone biopsy system with an eccentric drill tip 237
Ultrasound-guided renal biopsy with biopsy gun technique – Efficacy and complications 276
Endoscopic ultrasonography with guided fine needle aspiration biopsy of a mediastinal mass lesion . . . 326
Clinical results after percutaneous automated lumbar nucleotomy. A follow-up study 418
Water jet angioplasty – An experimental study 453
Ultrasonically guided insertion of a peritoneo-gastric

shunt in patients with malignant ascites 481
Yield and complications in ultrasound-guided biopsy of abdominal lesions. Comparison of fine-needle aspiration biopsy and 1.2-mm needle core biopsy using an automated biopsy gun 485
CT-diskography, diskomanometry and MR imaging as predictors of the outcome of lumbar percutaneous automated nucleotomy 613

Experimental radiology

Cardiac effects of adding electrolytes and oxygen to iohexol in a dog model of contrast media-induced ventricular fibrillation 47
Experimental studies comparing iohexol and ^{51}Cr-EDTA for glomerular filtration rate measurements 58
Dynamic high-field MR imaging in experimental porcine acute pancreatitis 182
Contrast medium-induced vasoconstrictions. An investigation of the vasoconstrictive action of iohexol in isolated rabbit coronary arteries 198
Effects on erythrocyte aggregation and blood coagulation from iohexol solutions with and without sodium chloride. An *in vitro* study on the role of ion concentration and osmolality 204
Microradiographic anatomy of the explanted rat colon 210
In vivo thromogenicity of intravascular ultrasound imaging catheters 280
CNS-effects from subarachnoid injections of iohexol and the non-ionic dimers iodixanol and iotrolan in the rabbit 307
Vasoconstriction of isolated arteries induced by angiographic contrast media. A comparison of ionic and non-ionic contrast media iso-osmolar with plasma 312
Flow measurements with digital subtraction densitometry in a steady flow experimental model 402
Comparative study of the dialysability of iobitridol and iohexol in the rat with impaired renal function 545
Deuterium MR *in vivo* imaging of the rat eye using $^{2}H_2O$ 552

Contrast media and other drugs

Static, dynamic and first-pass MR imaging of musculoskeletal lesions using gadodiamide injection . . 27
Combination of gadolinium and dysprosium chelates as a cellular integrity marker in MR imaging 41
Cardiac effects of adding electrolytes and oxygen to iohexol in a dog model of contrast media-induced ventricular fibrillation 47
Coronary angioplasty using a low osmolar nonionic contrast medium. A retrospective angiographic and clinical evaluation 54
Experimental studies comparing iohexol and ^{51}Cr-EDTA for glomerular filtration rate measurements 58
Effect of iopentol on renal function and its use for calculation of glomerular filtration rate in children 64
Cerebral thromboembolic complications associated with the use of a nonionic contrast medium in coronary angiography 69
Acute and late adverse reactions to low-osmolal contrast media 72
Intracranial iotrolan distribution following cervical myelography. Postmyelographic registration of adverse effects, psychometric assessment and electroencephalographic recording 77
Iodide mumps after intravascular administration of a nonionic contrast medium. Case report and review of the literature 82
Artifacts in MR imaging caused by small quantities of powdered iron 92
Correlation between chondroitin sulfate iron colloid-enhanced MR imaging and the histological grade of hepatocellular carcinoma 102
Contrast-enhanced MR imaging of the breast in patients with breast implants after cancer surgery . . . 111
Prediction of the time to peak hepatic enhancement to optimize contrast-enhanced spiral CT 154
Contrast medium-induced vasoconstrictions. An investigation of the vasoconstrictive action of iohexol in isolated rabbit coronary arteries 198
Effects on erythrocyte aggregation and blood coagulation from iohexol solutions with and without sodium chloride. An *in vitro* study on the role of ion concentration and osmolality 204
Brain metastases – Comparison of gadodiamide injection-enhanced MR imaging at standard and high dose, contrast-enhanced CT and non-contrast-enhanced MR imaging 300
CNS-effects from subarachnoid injections of iohexol and the non-ionic dimers iodixanol and iotrolan in the rabbit 307
Vasoconstriction of isolated arteries induced by angiographic contrast media. A comparison of ionic and non-ionic contrast media iso-osmolar with plasma 312
Carbon dioxide in vascular imaging and intervention 330
Dy-DTPA-BMA as an indicator of tissue viability in MR imaging. An experimental study in the pig . . . 338
MR imaging of double-contrast enhanced porcine myocardial infaction. Correlation with microdialysis 346
Oral contrast media in CT of the abdomen. Iohexol of different concentrations as a gastrointestinal contrast medium 396
Determination of the relative glomerular filtration rate of each kidney in man. Comparison between iohexol CT and ^{99m}Tc-DTPA scintigraphy 410
Contrast media leakage to the cerebrospinal fluid after intravenous injection. Comparison of stroke patients and controls 440
Comparative study of the dialysability of iobitridol

and iohexol in the rat with impaired renal function 545
Contrast enhancement of the upper abdomen evaluated by CT. A comparison between iohexol 350 mg I/ml and iopamidol 370 mg I/ml 549
MR imaging of gadolinium-DTPA-BMA-enhanced reperfused and nonreperfused porcine myocardial infarction 633
Neural tolerance of the non-ionic dimers iodixanol and iotrolan and the non-ionic monomer iopamidol during myelography in non-anaesthetised rabbits . . 644

Physics and technique

Experiences with a teleradiology system in pulmonary diseases 37
Radiation burden in high-resolution CT of the lungs 106
Texture analysis in quantitative MR imaging. Tissue characterisation of normal brain and intracranial tumours at 1.5 T 127
Wooden foreign bodies in CT. Case reports and experimental studies 148
Prediction of the time to peak hepatic enhancement to optimize contrast-enhanced spiral CT 154
Simple and safe device for pneumatic reduction of intussusception 215
Digital luminescence radiography and conventional radiography in abdominal contrast examinations . . 284
Computed vs. film-screen magnification radiography of fingers in hyperparathyroidism. An ROC analysis 290
Magnetization transfer contrast on gradient echo MR imaging of the temporomandibular joint 295
Evaluation of volume selection methods *in vivo* MRS. Design of a new test phantom 317
Artefacts caused by dental filling materials in MR imaging 323
Carbon dioxide in vascular imaging and intervention 330
Intraobserver and interobserver variations in sonographic measurements of kidney size in adult volunteers. A comparison of linear measurements and volumetric estimates 399
Flow measurements with digital subtraction densitometry in a steady flow experimental model 402
Determination of the relative glomerular filtration rate of each kidney in man. Comparison between iohexol CT and ^{99m}Tc-DTPA scintigraphy 410
Computed radiography in scoliosis. Diagnostic information and radiation dose 429
Water jet angioplasty – An experimental study 453
Videoradiography of free jejunal grafts for rehabilitation of speech in laryngectomized patients 469
Dynamic Octreotide scintigraphy in neuroendocrine tumours 474
Low-field MR imaging of the spine. A comparative study of a traditional and new, completely balanced gradient-echo sequence 505
Echo-planar MR cerebral blood volume mapping of gliomas. Clinical utility 520
A 3-D method for delineation of activity distributions and assessment of functional organ volumes and SPECT 536
Efficient memory management strategy in hypermedia with interactive MR images 556
CT-assessment of dependent lung densities in man during general anaesthesia 626
AMBER chest radiography and patient dose measurements 641
Cine phase contrast angiography of normal and diseased peripheral arteries 649
Use of an enhanced gradient system for diffusion MR imaging with motion-artifact reduction 662
Digital optical card. A promising technology for documentation and communication of images 674
